

Brockmann Consult GmbH is an innovative company internationally operating in the domain of environmental and geo-informatics. We currently engage a staff of 22 highly skilled individuals comprising natural scientists, computer scientists and engineers. We would like to hire at the earliest possible date an experienced

## **Network Engineer/Administrator (w/m)**

The operational area will be the deployment, configuration, maintenance and monitoring of computer hardware and software that comprises Brockmann Consult's computer network. Brockmann Consult is involved in the operational processing and distribution of space born Earth Observation data. These tasks require a very efficient, reliable and robust infrastructure.

The candidate's main responsibility will be to ensure that the network is up and running, including all internal processes and our internal and external services. This also includes control of our hardware and software inventory as well as its procurement, installation and update. She/he will also be heavily involved in the designing and drafting of new network topologies whenever required.

We expect that the applicant be very well used to Unix shell programming. Good knowledge of other scripting languages, in particular Python, is very welcome. Due to the nature of our company's main business, environmental informatics and geo-information services, we also appreciate a basic interest in natural science and image processing.

While our servers all run on Linux operating systems, our workstations run mainly Windows XP, Vista, 7 and Mac OS X. The software services to be maintained include Apache web servers and Tomcat application servers. Furthermore we run Liferay portal servers, Confluence Wikis, JIRA issue trackers and a TeamCity build server.

The success of Brockmann Consult is backed by a high customer satisfaction and we offer an attractive position in a company attaching great importance to a pleasant and motivating working atmosphere. Interested? Then we are looking forward receiving your application!
