

VACANCY NOTE

Brockmann Consult GmbH is an innovative company internationally operating in the domain of environmental informatics and geo-information services. We currently engage 22 highly skilled individuals comprising nature scientists, computer scientists and engineers. We are currently expanding the activities of our Geo-Information Services Department and look for an enthusiastic geoscientist or physicist:

Remote Sensing Scientist (w/m)

The working field will be remote sensing of water bodies including method development and optimization, image processing and data analysis. The work will be performed in the framework of the EU FP7 R&D projects Freshmon and Aquamar. The vacancy is open from now on. The contract will be for 3 years with the intention to turn it into a permanent position.

The position requires a very good understanding in ocean colour remote sensing as well as physics and mathematics. Good skills in scientific programming as well as working with computers are expected, as well as good knowledge of the English language (written and oral).

The success of Brockmann Consult is backed by a high customer satisfaction and we offer an attractive position in a company attaching great importance to a pleasant and motivating working atmosphere. Interested? Then we are looking forward receiving your application!

Please send your application documents until 30.07.2010 as PDF to
