

We are hiring a

Project Manager (f/m/d)

Brockmann Consult GmbH is developing various applications for the analysis and exploitation of Earth observation data. We provide end-to-end data analytics services and applications as well as the software components to build them. Our customers are national and international organisations, including, for example, the European Space Agency and the European Commission.

Brockmann Consult GmbH offers an attractive job in a company which prides itself on its customer satisfaction and attaches great importance to having an enjoyable and positive working environment. The applicant's openness, imagination, thirst for knowledge and pleasure working in agile teamwork are of highest value to us.

Our work is organised in projects, and most of our contracts involved international teams. Often we act as prime contractor and are the responsible interface to the client. This requires the management not only of the BC team working on the project but also steering of the whole project. The project manager will be responsible for providing (overall management, and) overseeing completion, of complex Earth observation projects. They will play a crucial role in liaising between clients and scientists to ensure all project requirements are met in scope and time. You will work in close cooperation with national and international scientists and you should have an eagerness to learn new subjects and to find elegant solutions to complex questions. Your ability to work in a small and motivated team is seen as being very important. The ideal candidate is highly motivated and needs little direction to complete tasks.

Responsibilities

- Act as a project manager to national and international teams of Earth observation scientists (and Software Engineers);
- Oversee multiple projects of the same thematic domain, coordinate BC contributions and contribute to the development of that thematic domain
- Perform all duties associated with planning, execution and completion of complex projects;
- Track status and report to management/clients the project (budget,) schedule and completion forecast
- Have the ability to communicate complex issues;
- The organisation of the work and the team members working on the project;
- The internal and external communication;
- Monitor and report on project progress;
- Delivery all deliverables in due time and best quality;
- Be driven by quality, customer satisfaction and deadlines.

Required Skills

- Theoretical and practical project management knowledge;
- Profound expertise in project management ;
- Background in Earth Observation and/or Climate Sciences;
- Willingness for regular travel within Europe;
- The ability to make decisions;
- Conflict resolution experience;
- Adaptability;
- Understanding ,to some extent, the subject, science and techniques of the project(s);
- Love working in diverse teams (national and international);
- Very good communication skills (written and spoken) in English.

Preferred Skills

- Very good communication skills (written and spoken) in German, other European languages are very welcome;
- The ability to work with project management software & tools.

Education

Academic degree in Natural/Geosciences, Geography, Remote Sensing, Climate Sciences or related discipline

We offer

- A flat hierarchy and short lines of communication;
- Working in cooperative, self-organising teams;
- An enjoyable and positive working environment;
- Exciting intellectual and technical challenges;
- Continuous personal development and education;
- Use of latest technologies and tools;
- Flexible organisation of working time;
- A permanent contract; annual gratification based on company performance;
- Company pension scheme;
- New, spacious, light-flooded offices;
- A location in the centre of Hamburg Bergedorf (10 min to S-21).
