

Geoscientist or Data Scientist (m/f/d) for Remote Sensing Applications in Coastal Areas

We, Brockmann Consult GmbH, develop remote sensing-based products with a focus on water remote sensing and coastal applications. Our customers are national and international organizations, this includes e.g., the European Space Agency (ESA) or the European Organization for the Use of Meteorological Satellites (EUMETSAT). Our developments serve exclusively the civilian sector.

We are proud of our customers' satisfaction of and attach great importance to a pleasant working environment for our employees.

For our office in Hamburg, we are looking for a **Geoscientist, Data Scientist or an expert with comparable education/experience comparable education (f/m/d) for the development and generation of user-tailored Earth Observation products.**

Your tasks include:

- Requirement analyses
- Development, implementation and testing of procedures to derive biogeophysical or morphological quantities from remote sensing data
- Automation of processes
- Configuration and monitoring of operational processing
- Writing of technical documentation and reports
- Presentation of results in German and English.

What you bring along:

- Completed studies in the field of geosciences, geography, geoinformatics, data science, physics or similar. Lateral entrants are also welcome with demonstrable qualifications.
- Experience with the analysis of optical or SAR remote sensing data
- Enthusiasm for spatial data and environment-related topics
- Confident use of Microsoft Office
- Good written and spoken English
- Advantageous are
 - o Programming experience with Python
 - o Experience with GIS
 - o Willingness to travel.

And this is what we offer you:

- A permanent full-time job
- Flat hierarchies and short communication channels
- Work in cooperative, self-organized teams
- New, spacious, light-flooded offices
- A workplace within walking distance of the Bergedorf S-Bahn station (S-21)
- A pleasant working environment and a positive work climate
- Exciting intellectual and technical challenges
- Use of the latest technologies and tools
- Annual health budget and job bike leasing
- Flexible working hours
- Bonus payments.

Contact:

If you also appreciate a lively exchange with scientists and software developers in international teams, then we look forward to receiving your application, preferably by e-mail, stating your earliest possible starting date and your salary expectations.
